Location: Coimbatore

PROFESSIONAL SUMMARY

Software Engineer with **3+ years of experience** building secure, scalable backend systems using **Java** and **Spring Boot**. Skilled in RESTful APIs and real-time systems (**WebSockets**, **MQTT**), and CI/CD automation, with hands-on exposure to cloud-native practices. Strengthening DSA, System Design, and database fundamentals to build robust, production-grade solutions. Experienced in agile environments, code reviews, and clean architecture best practices.

CORE TECHNICAL SKILLS

Programming Languages

- Java (Core Java, OOP, Collections, Multithreading)

Cloud & Infrastructure

- AWS: EC2, S3, IAM, VPC (hands-on fundamentals)
- Docker (containerization, images, volumes)
- Infrastructure fundamentals & cloud-native concepts

Backend & Integration

- RESTful APIs, API versioning
- WebSockets, MQTT (real-time communication)
- Microservices architecture
- JSON, HTTP, authentication basics

DevOps & Automation

- CI/CD Pipelines: Jenkins (conceptual), Codemagic (hands-on), GitHub Actions
- Build, release, and deployment automation
- Git, GitHub, Bitbucket, Linux
- Terraform (learning – IaC concepts, modular design)

PROFESSIONAL EXPERIENCE

Software Development Engineer - II

Closerlook Digital | March 2025 - Present

- Built a Spring Boot-based **infrastructure monitoring system** tracking server health, DNS resolution, and SSL certificate expiry, enabling proactive detection of outages.
- Designed and implemented RESTful microservices and real-time pipelines (**WebSockets, MQTT**) consumed by a **Flutter-based application**, processing thousands of daily transactions across 500+ active assets.
- Identified recurring production issues and implemented automation and architectural improvements, improving system stability and reducing manual intervention.
- Conducted **code reviews** and **mentored junior engineers**, driving adoption of clean architecture and backend best practices.
- Collaborated with DevOps and QA teams in agile CI/CD-driven workflows, improving release reliability.

Software Development Engineer - I

Closerlook Digital | March 2023 - March 2025

- Developed and maintained secure, production-grade applications used across 500+ active assets.
- Integrated backend services using REST APIs and real-time streams.
- Worked extensively in Linux environments for debugging, logging, and root-cause analysis.
- Improved operational stability by analyzing bottlenecks and optimizing data flows.
- Actively participated in agile ceremonies, sprint planning, and technical design discussions.

Software Development Engineer - Intern

Closerlook Digital | Nov 2022 - March 2023

- Implemented backend-integrated features under senior mentorship.
- Debugged and resolved 20+ issues across application and API layers.
- Gained exposure to production release cycles, CI/CD pipelines, and quality practices.

ACADEMIC HISTORY

KUMARAGURU COLLEGE OF TECHNOLOGY | 2021 - 2023

Master of Computer Applications | GPA: 7.3
